PROFESSIONAL SUMMARY

Motivated Computer Science and Engineering student with hands-on experience in Python, Java, SQL, Data Science, and Machine Learning. Seeking an entry-level Software Engineer, Data Analyst, or AI/ML role to apply technical and problem-solving skills while contributing to innovative solutions.

EDUCATION

PSNA College of Engineering and Technology

Sep 2023 - Jun 2027

Bachelor of Engineering in Computer Science | CGPA: 8.8

St. Joseph's Girls' Higher Secondary School

Jun 2022 - Mar 2023

XII Standard | Percentage: 92.5

EXPERIENCE

Python & AI Intern - AbserveTech Pvt Ltd

Jul. 2026 - Jul. 2026

- Developed an AI-powered El Nino Early Warning System.
- Built machine learning models and a Flask web application for climate forecasting.

Data Science Intern - Prodigy InfoTech

Jun. 2025 - Jul. 2026

- Performed data cleaning, analysis, and visualization.
- Built basic machine learning models using Python.

Java Programming Intern - Code Alpha

Jan. 2025 - Feb. 2025

- Developed applications such as Travel Planner, Banking System, and Grade Tracker.
- Applied OOP concepts using Java, Swing, and AWT.

Python Programming Intern - CodSoft

Jul. 2024 - Aug. 2024

- Built projects including Grade Tracker, Alarm Clock, and Calculator using core Python.
- Utilized core Python concepts such as functions, file handling, loops, and object-oriented programming to create efficient solutions.

PROJECTS

Crowd Management System

- Built an AI/ML-based system to monitor and analyse crowd density in real time using computer vision.
- Detected overcrowding patterns from surveillance feeds and generated alerts when safety thresholds exceeded.
- Aimed at improving public safety in events, transit hubs, and smart city environments.

Tech: Python, Machine Learning, OpenCV

Smart Intersection Accident Prevention

- Developed a neural-network-based smart intersection system to predict and prevent potential traffic accidents.
- Analysed vehicle movement, speed, and signal data to identify high-risk collision scenarios.
- Enhanced road safety through proactive alerts and intelligent traffic control.

Tech: Python, Neural Networks, Machine Learning

ACTIVITIES AND ACHIEVEMENTS

- Smart India Hackathon - Smart Education Track, One Stop Career Guidance
- Guvi SWAiT Learnathon (RAG application)
- Sustainable AI Challenge - Round 2 Qualifier
- E-Yuva Final Round Participant - Smart Wound Monitoring Bandage

CERTIFICATIONS

- TCS iON Career Edge - Young Professional
- NPTEL - Introduction to Internet of Things & Introduction to Machine Learning
- IBM - Data Visualization with Python, Digital Analytics & Regression
- Cisco - Introduction to Data Science
- UiPath - Automation Developer

SKILLS

Technical Skills

- Programming Languages: Python, Java, SQL, HTML, CSS
- Libraries & Frameworks: Flask, Streamlit, TensorFlow, NumPy, Pandas, Matplotlib, Scikit-learn
- Tools & Platforms: GitHub, Git, VS Code, Jupyter Notebook, XAMPP
- Database Technologies: SQL, SQLite, MongoDB
- Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms, Database Management Systems (DBMS), Machine Learning, Artificial Intelligence, Neural Networks & Deep Learning (NNDL), Internet of Things (IoT) Fundamentals, Data Analysis, Data Visualization

Soft Skills

- Team Collaboration
- Leadership
- Communication Skills
- Adaptability
- Time Management
- Project Management
- Attention to Detail
- Quick Learning Ability
- Presentation & Public Speaking
